3. Expand **Mail and Newsgroups** by click the + sign
4. Click **Mail Servers**
5. On the right side change the **Outgoing Mail Server:** from **mail.california.com** to **mail.california.com:80**
6. Click **OK**
7. Restart Netscape

Eudora for Windows

Eudora has chosen to hide the Port change option in version 6.0 and up, making it more difficult to make this change. If you have purchased Eudora, we would suggest contacting them about making this option available by default again. To enable changing ports:

1. Navigate to your Eudora install directory.
2. Look in the Eudora directory for the directory "extrastuff".
3. In this directory is a file named "esoteric.epi". Drag (copy or move) this file into the main Eudora directory. There will now be options extra listed, including a Ports page.

To change the outgoing mail port from 25 to 80:

1. Launch Eudora
2. Drop down the **Tools** menu, and choose **Options**
3. Click on **Ports**
4. Change the port from **25** to **80**
5. Click **OK**
6. Restart Eudora

Eudora for Mac

As above, Eudora has hidden the ports option in version 6.0 and up. If you have purchased Eudora, we suggest contacting them about this, as there is no reason to make this difficult. To change the outgoing mail port from 25 to 80:

1. For version 6.0 and up, quit Eudora and look in the Eudora Application Folder for the folder "Extras". In this folder is a file "Esoteric Settings". Drag this file into the "Eudora Stuff" folder,
 2. Launch Eudora
 3. Drop down the **Special** menu, and choose **Settings**
 4. Click on **Ports and Protocols**
 5. Change the port from **25** to **80**
 6. Click OK
 7. Restart Eudora
-

Entourage

To change the outgoing mail port from 25 to 80:

1. Launch Entourage
 2. Drop down the **Tools** menu, and choose **Accounts**
 3. Click on **Mail**, and go to **Properties**
 4. Click **Advanced Sending Options**
 5. Make sure the box that says "This POP service requires a secure connection" is **unchecked**
 6. Check the box that says "Override default SMTP port:" and enter in port **80**
 7. Click OK
 8. Restart Entourage
-
